medical attention is obtained.

### General:

Bring the safety data sheet or label when seeking medical advice.

### 4.2. Most important symptoms/effects, acute and delayed

Inhalation is irritating to the upper airways. Ingestion may cause caustic burning in mouth, esophagus and stomach. Pains in mouth, throat and stomach. Difficulty swallowing, feeling unwell and vomiting of blood. Brown spots and burns may appear in and around the mouth. Has a caustic burning effect and causes burning pain, reddening, blistering and burning sores if it comes in contact with skin. Eye contact may result in deep caustic burns, pain, tearing and cramping of the eyelids. Risk of serious eye injury and loss of sight. May cause sensitization by skin contact. Symptoms include reddening, swelling, blistering and ulceration - often slowly developing.

### 4.3. Indication of immediate medical attention and special treatment needed, if necessary

Ensure that medical personnel are aware of the material involved, and take precautions to protect themselves.

## SECTION 5: Fire-fighting measures

### 5.1. Suitable extinguishing media

**Suitable extinguishing media:** Extinguish with powder, foam or water mist. Use water or water mist to cool non-ignited stock.

**Unsuitable extinguishing media:** Do not use a jet of water, as it may spread the fire.

### 5.2. Specific hazards arising from the chemical

The product decomposes when combusted and the following toxic gases can be formed: Phosphorous oxides/ Hydrogenchloride.

### 5.3. Special protective actions for fire-fighters

Move containers from danger area if it can be done without risk. Avoid inhalation of vapor and smoke gases - seek fresh air. Wear Self-Contained Breathing Apparatus (SCBA) with a chemical protection suit. Extinguishing water which has been in contact with the product may be corrosive.

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

**For non-emergency personnel:** Stay upwind/keep distance from source. Stop leak if this can be done without risk. Wear safety goggles/face protection. Wear gloves.

**For emergency responders:** In addition to the above: Chemical protective suit is recommended.

### 6.2. Environmental precautions

Prevent spillage from entering drains and/or surface water.

### 6.3. Methods and materials for containment and cleaning up

Contain and absorb spills using sand or other absorbent material and transfer to suitable waste containers. Caution! Causes burns. Rinse with water.

### 6.4. Reference to other sections

See section 8 for type of protective equipment.  
See section 13 for instructions on disposal.

**Measuring methods:** Compliance with occupational exposure limits may be checked by occupational hygiene measurements.

### 8.2. Exposure controls

**Appropriate engineering controls:** Wear the personal protective equipment specified below.

**Personal protective equipment, eye/face protection:** Wear safety goggles/face protection.

**Personal protective equipment, hand protection:** Wear gloves. Type of material: Butyl rubber/ Neoprene rubber/ Breakthrough time has not been determined for the product. Change gloves often. The suitability and durability of a glove is dependant on usage, e.g. frequency and duration of contact, glove material thickness, functionality and chemical resistance. Always seek advice from the glove supplier.

**Personal protective equipment, respiratory protection:** Light use (small volume, shortterm contact (below 10 min.)): Not required.  
Medium use (medium volume, medium contact (1-2 hours)): Wear respiratory protective equipment. Filter type: E.

**Environmental exposure controls:** Ensure compliance with local regulations for emissions.
